COPYRIGHT STATEMENT

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted materials including foreign works under certain conditions. In addition, the United States extends protection to foreign works by means of various international conventions, bilateral agreements, and proclamations.

Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

The Columbia University Libraries reserve the right to refuse to accept a copying order if, in its judgement, fulfillment of the order would involve violation of the copyright law.

ELECTRIC CONSTRUCTION BUDGETS AND
SCHEDULED ADDITIONS TO GENERATING CAPACITY

1942

The electric utility industry contemplates construction expenditures during 1942 aggregating \$1,069,309,387 according to reports filed by electric utilities with the Federal Power Commission. This amount compares with total construction expenditures of \$869,586,854 during 1941. Budgeted construction additions for 1941 as reported in the beginning of that year totaled \$868,208,950.

The above figures include budgets and expenditures of private and municipal electric utilities, cooperatives, and Federal and State projects. Accounts of certain of the Federal and other publicly-owned utilities and projects are kept on a fiscal year basis. Consequently, the budget figures for 1942 include \$265,379,111 reported on the basis of the 1942 fiscal year and the 1941 expenditures include \$119,868,000 reported on the basis of the fiscal year.

A comparison of budgeted expenditures for 1942 by construction classifications with actual expenditures for 1941 is shown in the following table.

TABLE A - CONSTRUCTION BUDGETS AND EXPENDITURES
BY CONSTRUCTION CLASSIFICATION

CONSTRUCTION CLASSIFICATION	1942 BUDGETED EXPENDITURES	1941 ACTUAL EXPENDITURES
Generating Capacity		
Hydro	\$ 266,251,968	\$ 154,335,992
Steam	263,652,487	218,827,753
Internal Combustion	6,317,953	8,101,600
Total	536,222,408	381,265,405
Transmission	212,110,071	123,844,149
Distribution	285,988,794	318,415,298
General	34,987,514	46,062,002
Total	\$ 1,069,309,387	\$ 869,586,854

It will be observed that increases in expenditures for 1942 over 1941 are confined to expenditures for generating capacity and transmission facilities. Expenditures for generating capacity in 1942 are expected to be approximately \$155,000,000 in excess of such expenditures for 1941. Expenditures for transmission facilities are expected to increase some \$88,000,000. Expenditures for distribution and general plant are expected to decrease by approximately \$32,000,000 and \$11,000,000, respectively.

Comparisons of 1942 budgeted expenditures with 1941 budgeted and actual expenditures are shown in the following table by classes of ownership and geographic divisions.

TABLE B - BUDGETED CONSTRUCTION EXPENDITURES - 1942
BUDGETED AND ACTUAL CONSTRUCTION EXPENDITURES - 1941

CLASS OR DIVISION	1942 BUDGETED EXPENDITURES	1941 ACTUAL EXPENDITURES	1941 BUDGETED EXPENDITURES
By Class of Ownership			
Private	\$ 621,945,204	\$ 591,918,548	\$ 597,101,555
Public	447,364,183	277,668,306	271,107,395
United States	\$ 1,069,309,387	\$ 869,586,854	\$ 868,208,950
By Geographic Division			
New England	\$ 56,104,802	\$ 51,016,961	\$ 45,614,593
Middle Atlantic	161,065,223	139,355,025	146,364,542
East North Central	200,144,353	191,648,625	212,107,213
West North Central	60,919,601	54,903,060	52,259,448
South Atlantic	144,682,650	139,788,201	117,994,253
East South Central	180,146,043	107,745,752	97,241,025
West South Central	67,219,721	45,854,465	31,497,201
Mountain	28,968,409	23,759,577	24,488,006
Pacific	169,238,585	116,515,188	140,642,669
United States	\$ 1,069,309,387	\$ 869,586,854	\$ 868,208,950

Although, as may be observed, the actual expenditures for 1941 were extremely close to aggregate budgeted amounts as reported at the beginning of that year, changes in conditions resulting from the expanding war program may result in a larger deviation between budgeted and actual expenditures for the present year.

SCHEDULED GENERATING CAPACITY ADDITIONS - NAME PLATE RATING

Generating capacity scheduled for addition by electric utilities during 1942 amounts to a total of 3,735,035 kilowatts. This scheduled capacity increase represents the name plate rating of gross additions and compares with 3,352,639 kilowatts scheduled gross additions for 1941 as reported to the Commission at the beginning of last year. A preliminary determination of net additions for 1941, taking into account retirements and other adjustments, indicates such net additions to have been 2,447,310 kilowatts.

Table C compares the scheduled gross generating capacity additions for 1942 with the gross additions scheduled for 1941 and with the preliminary net additions for 1941. All generating capacity figures in this report are in terms of name plate rating.

TABLE C - SCHEDULED GROSS ADDITIONS 1942 AND 1941
NET ADDITIONS 1941 (PRELIMINARY)

CLASS OR DIVISION	(Kilowatts)		NET ADDITIONS (PRELIMINARY) 1941

Total	\$ 621,945,204	\$ 591,918,548	\$ 447,364,183	\$ 277,668,306

Scheduled gross capacity additions for 1942 as well as preliminary net additions to capacity for 1941 by class of ownership are shown in Table F. It should be noted that capacity changes occasioned by sales and acquisitions between the privately owned and publicly owned classes are reflected in the figures representing 1941 net additions.

DATA BY STATES

Table 1, pages 4 to 7, shows 1942 budgeted electric construction expenditures by states and by construction classification and class of ownership.

Table 2, pages 8 to 11, shows 1941 actual electric construction expenditures by states and by construction classification and class of ownership.

Table 3, pages 12 to 16, presents data on scheduled generating capacity by states, by type of prime mover and by class of ownership.

The figures given in this report for 1942 additions to generating capacity represent gross scheduled additions and since removals may be made during the year, it is probable that the net increase in generating capacity for 1942 will be somewhat lower than the figures shown. It is also evident that the figures are not adaptable for use in determining the cost per kilowatt of additional installed capacity since a portion of the capacity scheduled for completion in 1942 was under construction prior to January 1, of this year and a portion of the construction expense has been covered by expenditures during previous years. Also, a portion of the total expenditure to be made during 1942 will apply to generating capacity that will not be placed in service until some time subsequent to December 31, 1942.
